

# MEASURE DIAGRAM 1

This diagram is to illustrate how to measure for driveshafts with a slip yoke at the transmission and a u-joint at the differential.

NOTE: Vehicle should be measured under normal load with the wheels on the ground and axles under normal load or rear end supported on the safety jack stands. Driveshafts should never be measured with the rear suspension hanging.

#1 What is the overall length measurement from the end of the transmission or transfer case housing end to the flat surface on the pinion yoke?

\_\_\_\_\_ INCHES

#2 How wide does the rear u-joint need to be to fit your pinion yoke?

2A - If your pinion yoke DOES NOT have locating tabs see figure 2A

\_\_\_\_\_ INCHES

2B - If your pinion yoke DOES HAVE locating tabs see figure 2B

3 <sup>7</sup>/<sub>32</sub> or 3 <sup>5</sup>/<sub>8</sub> INCHES

#3 What size is the diameter of the caps on the rear differential yoke?

1 <sup>1</sup>/<sub>16</sub> 1 <sup>1</sup>/<sub>8</sub> 1 <sup>3</sup>/<sub>16</sub>

#4 How far does your output shaft stick out past the end of the case?

\_\_\_\_\_ INCHES

#5 2WD – What is the model name or number of the transmission?

\_\_\_\_\_

4WD – What is the model name or number of the transfer case?

\_\_\_\_\_

#6 How many splines are there on the output shaft?

\_\_\_\_\_
